Summary

Penetration tester with experience conducting vulnerability assessments, scanning networks, enumerating and attacking Active Directory environments and web applications, and communicating with clients.

Experience

Penetration tester

- I used Burp and Nmap to perform penetration test on a Lime EV Bike company. The scope was to identify open services and check against the OWASP Top 10.
- Conducted a formal vulnerability assessment and found three CVEs.
- Conducted web app pentests in a limited time frame with custom code alongside my team.
- Produced professional written reports on my findings, helping to improve the report writing process.
- Communicated security vulnerability to key stakeholders, including non-technical C-suite members.

Junior penetration tester

- Experienced assisting on my first penetration test.

- After shadowing seniors I led my own penetration test, finding one major vulnerability.
- Performed managed vulnerability scanning and PCI assessments.
- Supported with pentest kick-off calls and debriefs with clients.

Skills & tools

- Burp Suite.
- Experience with pen testing tools and frameworks such as, Nessus, and Nmap.
- Experience using Nmap NSE Scripts.
- Strong knowledge of programming languages including Python, JavaScript, and C.

Certifications

- Burpsuite Web Security +
- HTB Certified Penetration Testing Specialist (CPTS).

Education

Bsc Computer Science with Cyber Security - Rathinam College of Arts and Science
